Job Outlook/Professional Highlights:

Audiology is one of the fastest growing professions in the country today, with hearing and balance disorders increasing as the population ages. As an audiologist, you will join more than 13,000 practicing audiologists in the U.S. and stand at the center of the team providing advanced hearing care and:

- Evaluate, diagnose and treat hearing and balance disorders
- Prescribe and fit prosthetic devices to patients with hearing impairments
- Direct rehabilitative programs for the hearing and balance impaired
- Design and direct programs to identify newborns with hearing impairments
- Assist children with learning disabilities and central auditory processing disorders
- Identify, prevent, evaluate and treat a variety of hearing disorders
