## OTD Program Includes:

- Emphasis on advancing clinical skills, grant writing, research and scholarship dissemination, and teaching in higher education
- Set your own pace (complete in as little as 16 months, 27 months, or up to five years)
- Select your advanced specialty track (Health and Wellness or Remedial Vision Rehabilitation)

## Choose One Specialty Track:

**Remedial Vision Rehabilitation - Pediatrics and Acquired Brain Injury:** This track is designed to enable occupational therapists to gain a comprehensive understanding of vision problems prevalent in acquired brain injury and pediatric populations. Students will learn how to screen for the most commonly occurring problems and perform remedial vision rehabilitation for clients with these problems in an ongoing collaboration with an optometrist.

**Health and Wellness:** This track is designed to enable occupational therapists from any area of clinical practice to develop advanced/evidence-based expertise in holistic and innovative healthcare skills to assist individuals, groups or populations with or at-risk for chronic illness or disability. Students will be exposed to health assessment and health promotion activities across the life span, global and cultural perspectives and community initiatives.

## Teaching and Scholarship in Higher Education Certificate:

Gain a comprehensive understanding of teaching and scholarship in academia. This certificate prepares students for the role of teaching in graduate programs, developing courses, designing conference proposals, writing grant applications, and reviewing the manuscript submission process.
