Salus University Signs Two New Agreements with Lock Haven University

Elkins Park, Pa. — Salus University has completed two new articulation agreements in the Doctor of Optometry Degree program with Lock Haven University in Lock Haven, Pa.

Under the 3 + 4 Doctor of Optometry Degree program, students who complete a minimum of 90 semester credits at Lock Haven with a 3.0 GPA or above can apply for admission to Salus University's Pennsylvania College of Optometry's (PCO) Doctor of Optometry program. Under the 4 + 4 Doctor of Optometry program, students who successfully complete a Bachelor of Science degree at Lock Haven with a 3.0 GPA or above may apply for admission to the Salus PCO's Doctor of Optometry program.

"Over the years, we've had several Lock Haven University students apply to Salus, so a partnership between our two universities was natural fit," said Monica Scirrotto, MS, director of admissions at University. "We are excited to begin these articulation agreements with our Doctor of Optometry program and look forward to

assisting future Lock Haven students in achieving their professional goals.”

Salus PCO will reserve two seats in each class of the Doctor of Optometry program for Lock Haven students who have successfully completed Phase I of the program and the application process for Phase II. If there are more than two such qualified Lock Haven students, the remaining Lock Haven students will be considered for admission along with the other applicants.

About Salus University

Salus University, founded as the Pennsylvania College of Optometry in 1919, today is a diversified, globally recognized professional academic center of learning that offers a wide range of degree programs in the professions of Optometry, Audiology, Physician Assistant, Public Health, Blindness and Low Vision Studies, Biomedicine, Occupational Therapy and Speech-Language Pathology. Salus operates four clinical facilities in Philadelphia and Montgomery counties that provide highly specialized vision, hearing and balance, and speech-language pathology services. The University has more than 1,200 students, and more than 14,000 alumni worldwide. For more information, please visit
